2. Hazards Identification

Thiourea is classified as hazardous according to Regulation (EC) no.1272/2008 Directive 67/548EEC. Hydrochloric acid and sulphamic acid are not classified in the concentrations present in the preparation.

It is category 4 for acute oral toxicity and category 2 for carcinogenicity, reproductive toxicity and chronic aquatic toxicity.

Eyes: Possible transient stinging
Skin: Regular contact may cause soreness or, rarely, an allergic rash.
Inhalation: Not applicable
Ingestion: Risk depends on level & duration of exposure.
Repeated ingestion may cause depression of the bone marrow.

Hazard Statements:
Harmful if swallowed.
Suspected of causing cancer.
Toxic to aquatic life with long lasting effects.

Precautionary Statements:
Do not swallow.
Avoid contact with skin and eyes.
Avoid release to the environment.
Seek medical advice as directed under First Aid Measures.
