

SAFETY DATA SHEET

According to Safe Work Australia

Printing date 14.12.2016

Revision: 14.12.2016

1. IDENTIFICATION: PRODUCT IDENTIFIER AND CHEMICAL IDENTITY

Product Name: FROSTBITE

Product Code: FB248

Recommended Use of the Chemical and Restriction on Use: Cryogenic cold spray

Details of Manufacturer or Importer:

Australian Dental Manufacturing
25 Billabong Street,
Kenmore Hills, QLD, 4069

Phone Number: 07 3878 1901

Emergency telephone number: National Poison Information Centre: 13 11 26

2. HAZARDS IDENTIFICATION

Hazardous Nature:

Classified as Hazardous according to the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) and Safe Work Australia criteria.

Classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail (7th edition).

flame

Flammable Gases 1

H220 Extremely flammable gas.

gas cylinder

Gases Under Pressure (Compressed gas) H280 Contains gas under pressure; may explode if heated.

Signal Word Danger

Hazard Statements

H220 Extremely flammable gas.

H280 Contains gas under pressure; may explode if heated.

Precautionary Statements

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P377 Leaking gas fire: Do not extinguish, unless leak can be stopped safely.

P381 Eliminate all ignition sources if safe to do so.

P410+P403 Protect from sunlight. Store in a well-ventilated place.

3. COMPOSITION AND INFORMATION ON INGREDIENTS

Chemical Characterisation: Substances

CAS No. Description

115-10-6 Dimethyl ether 100%

4. FIRST AID MEASURES

Inhalation:

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention if breathing problems develop.

(Contd. on page 2)

SAFETY DATA SHEET

According to Safe Work Australia

Printing date 14.12.2016

Revision: 14.12.2016

Product Name: FROSTBITE

(Contd. of page 1)

Skin Contact:

In case of skin contact, immediately remove contaminated clothing and wash affected areas with lukewarm water. Seek immediate medical attention.

Eye Contact:

In case of eye contact, hold eyelids open and rinse with water for at least 15 minutes. Protect eyes from bright light. Seek immediate medical attention.

Ingestion:

Ingestion is not considered a likely route of exposure.

If swallowed, do not induce vomiting. Never give anything by mouth to an unconscious person. Seek immediate medical attention.

Symptoms Caused by Exposure:

Inhalation: May cause respiratory irritation, headache, dizziness and nausea. May cause Central Nervous System (CNS) effects including incoordination, mood disturbances, confusion and narcotic effects leading to unconsciousness and death. May cause asphyxiation by displacement of oxygen. Signs of asphyxiation will be noticed when oxygen content is reduced to 16%. Unconsciousness leading to CNS damage and death will occur if the oxygen content is reduced to 8% or less.

Skin Contact: Skin contact may cause frostbite and cold burns with blistering and inflammation.

Eye Contact: Eye contact may cause irritation, frostbite and cold burns. May cause permanent eye damage.

Ingestion: Ingestion is not considered a potential route of exposure, as this product is a liquefied gas which vapourises quickly at room temperature and pressure. If the product enters the mouth it may cause irritation, frostbite and cold burns.

5 . FIRE FIGHTING MEASURES

Suitable Extinguishing Media: Water fog, foam, dry chemical or carbon dioxide.

Specific Hazards Arising from the Chemical:

Hazardous combustion products include oxides of carbon, water vapour, smoke and traces of silicon oxides.

Product is extremely flammable. Vapours may travel considerable distances to a source of ignition where they can ignite, flashback, or explode.

Contains gas under pressure; may explode if heated. Containers close to fire should be removed if safe to do so. Use water spray to cool fire exposed containers.

Special Protective Equipment and Precautions for Fire Fighters:

When fighting a major fire wear self-contained breathing apparatus and protective equipment.

6 . ACCIDENTAL RELEASE MEASURES

Personal Precautions, Protective Equipment and Emergency Procedures:

Wear approved self-contained breathing apparatus and full protective clothing. Evacuate all non-essential personnel from affected area. Do not breathe vapours. Ensure adequate ventilation. Extinguish all sources of ignition. Avoid sparks and open flames. No smoking.

Environmental Precautions:

In the event of a major spill, prevent spillage from entering drains or water courses.

Methods and Materials for Containment and Cleaning Up:

Avoid inhalation and skin or eye contact with vapour. Vapour is heavier than air and will settle in low points. Use water spray to disperse vapour.

Stop leak if safe to do so and absorb spill with sand, earth, vermiculite or some other absorbent material. Collect the spilled material and place into a suitable container for disposal. Small spills can be cleaned up with paper towels. Use only non-sparking tools. Wash area with plenty of water.

(Contd. on page 3)

SAFETY DATA SHEET

According to Safe Work Australia

Revision: 14.12.2016

Product Name: FROSTBITE

(Contd. of page 2)

7 . HANDLING AND STORAGE

Precautions for Safe Handling:

This product is only to be used by qualified dental staff.

Use of safe work practices are recommended to avoid eye or skin contact and inhalation of vapours. Use only in a well-ventilated area.

Take precautionary measures against static discharge. Food, beverages and tobacco products should not be stored or consumed where this material is in use. Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storage or re-use. Provide eyewash fountains and safety showers in close proximity to points of potential exposure.

Conditions for Safe Storage:

Store in a cool, dry and well ventilated area. Protect from heat, static electricity, sparks, open flames and other sources of ignition. Store at below 25 °C. Protect containers from physical damage. Check regularly for leaks. Keep away from strong oxidising agents, acids and halogens.

8 . EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure Standards:**115-10-6 Dimethyl ether**

WES	STEL: 950 mg/m ³ , 500 ppm
	TWA: 760 mg/m ³ , 400 ppm

Engineering Controls:

Maintain air concentration below occupational exposure standards, providing adequate ventilation. Use explosion-proof ventilating equipment.

Respiratory Protection:

Use an approved vapour respirator under conditions where exposure to the substance is apparent (e.g. generation of high concentrations of mist or vapour, inadequate ventilation, development of respiratory tract irritation) and engineering controls are not feasible. See Australian Standards AS/NZS 1715 and 1716 for more information.

Skin Protection:

PVC, PVA, nitrile, neoprene, rubber or vinyl gloves. See Australian/New Zealand Standard AS/NZS 2161 for more information. When selecting gloves for use against certain chemicals, the degradation resistance, permeation rate and permeation breakthrough time should be considered.

Occupational protective clothing (depending on conditions in which it has to be used, in particular as regards the period for which it is worn, which shall be determined on the basis of the seriousness of the risk, the frequency of exposure to the risk, the characteristics of the workstation of each worker and the performance of the protective clothing). See Australian/New Zealand Standard AS/NZS 4501 for more information.

Eye and Face Protection:

Eye and face protectors for protection against gases or liquids. See Australian/New Zealand Standard AS/NZS 1337 for more information.

9 . PHYSICAL AND CHEMICAL PROPERTIES

Appearance:

Form:	Compressed liquefied gas
Colour:	Colourless
Odour:	Perceptible ethereal chloroform-like odour.
Odour Threshold:	No information available
pH-Value:	No information available
Melting point/Melting range:	-141.5 °C
Initial Boiling Point/Boiling Range:	-24.8 °C

(Contd. on page 4)

SAFETY DATA SHEET

According to Safe Work Australia

Printing date 14.12.2016

Revision: 14.12.2016

Product Name: FROSTBITE

(Contd. of page 3)

Flash Point:	-41 °C
Flammability:	Extremely flammable
Auto-ignition Temperature:	235 °C
Decomposition Temperature:	No information available
Explosion Limits:	
Lower:	3 %
Upper:	18.6 %
Vapour Pressure at 20 °C:	5.16 kPa
Density:	No information available
Vapour Density:	1.6
Evaporation Rate:	No information available
Solubility in Water:	Soluble
Partition Coefficient (n-octanol/water):	No information available

10 . STABILITY AND REACTIVITY

Possibility of Hazardous Reactions: Hazardous polymerisation will not occur.

Chemical Stability: Stable at ambient temperature and under normal conditions of use.

Conditions to Avoid: Heat, sparks, open flames and other sources of ignition.

Incompatible Materials:

Strong oxidising agents (such as ozone, perchlorates, peroxides, permanganates, chlorates, nitrates, chlorine, bromine and fluorine), strong acids (such as hydrochloric, sulphuric and nitric acids) and halogens.

Hazardous Decomposition Products: Oxides of carbon, water vapour, smoke and traces of silicon oxides.

11 . TOXICOLOGICAL INFORMATION

Toxicity:

LD₅₀/LC₅₀ Values Relevant for Classification:

115-10-6 Dimethyl ether

Inhalation	LC ₅₀ /4 h	308 mg/l (rat)
------------	-----------------------	----------------

Acute Health Effects

Inhalation:

May cause respiratory irritation, headache, dizziness and nausea. May cause Central Nervous System (CNS) effects including incoordination, mood disturbances, confusion and narcotic effects leading to unconsciousness and death. May cause asphyxiation by displacement of oxygen. Signs of asphyxiation will be noticed when oxygen content is reduced to 16%. Unconsciousness leading to CNS damage and death will occur if the oxygen content is reduced to 8% or less.

Skin: Skin contact may cause frostbite and cold burns with blistering and inflammation.

Eye: Eye contact may cause irritation, frostbite and cold burns. May cause permanent eye damage.

Ingestion:

Ingestion is not considered a potential route of exposure, as this product is a liquefied gas which vapourises quickly at room temperature and pressure. If the product enters the mouth it may cause irritation, frostbite and cold burns.

Skin Corrosion / Irritation: Based on classification principles, the classification criteria are not met.

Serious Eye Damage / Irritation: Based on classification principles, the classification criteria are not met.

Respiratory or Skin Sensitisation: Based on classification principles, the classification criteria are not met.

Germ Cell Mutagenicity: Based on classification principles, the classification criteria are not met.

Carcinogenicity: This product does NOT contain any IARC listed chemicals.

(Contd. on page 5)

SAFETY DATA SHEET

According to Safe Work Australia

Printing date 14.12.2016

Revision: 14.12.2016

Product Name: FROSTBITE

(Contd. of page 4)

Reproductive Toxicity: Based on classification principles, the classification criteria are not met.**Specific Target Organ Toxicity (STOT) - Single Exposure:**

Based on classification principles, the classification criteria are not met.

Specific Target Organ Toxicity (STOT) - Repeated Exposure:

Based on classification principles, the classification criteria are not met.

Aspiration Hazard: Based on classification principles, the classification criteria are not met.**Chronic Health Effects:**

Repeated or prolonged exposure may cause damage to the liver, lungs, kidneys and CNS.

Existing Conditions Aggravated by Exposure: No information available**Additional toxicological information:** No information available

12 . ECOLOGICAL INFORMATION

Ecotoxicity: No adverse ecological effects are expected.**Aquatic toxicity:** No further relevant information available.**Persistence and Degradability:** This product is volatile and will readily vapourise into the atmosphere.**Bioaccumulative Potential:** Bioaccumulation is not expected to occur.**Mobility in Soil:**

This product will quickly vapourise and is not likely to penetrate into soils or contaminate ground water.

Other adverse effects: No further relevant information available.

13 . DISPOSAL CONSIDERATIONS

Disposal Methods and Containers: Dispose according to applicable local and state government regulations.**Special Precautions for Landfill or Incineration:**

Please consult your state Land Waste Management Authority for more information.

14 . TRANSPORT INFORMATION

UN Number ADG, IMDG, IATA	UN1950
Proper Shipping Name ADG, IMDG, IATA	AEROSOLS
Dangerous Goods Class ADG Class:	2.1
Packing Group:	Not applicable
EMS Number:	F-D,S-U
Hazchem Code:	Not applicable
Special Provisions:	63, 190, 277, 327, 344
Limited Quantities:	1L
Packagings & IBCs - Packing Instruction:	P207, LP02
Packagings & IBCs - Special Packing Provisions:	PP87, L2
